## RISK AND REWARD PROFILE

- The fund is in the category shown due to historic volatility (how much and how quickly the value of shares in the fund may have risen and fallen in the past due to movements in markets, currencies and interest rates). It may not be a reliable indication of the future risk profile of the fund.
- The risk category has been calculated using historic data and may not be a reliable indicator of the fund’s future risk profile.
- A risk indicator of “1” does not mean that the investment is “risk free”.

### The risk indicator may not fully take into account the following risks and the following may affect fund performance:

- **Market volatility risk:** The value of the fund and any income from it can fall or rise because of movements in stockmarkets, currencies and interest rates, each of which can move irrationally and be affected unpredictably by diverse factors, including political and economic events.
- **Currency risk:** The fund’s assets may be priced in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the fund’s value.
- **Concentration risk:** The fund may have investments concentrated in a limited number of holdings. This can be more risky than holding a wider range of investments.

Please refer to the fund’s prospectus for full details of these and other risks which are applicable to this fund.

## CHARGES FOR THE FUND

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
<b>This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.</b>	
Charges taken from the fund over a year	
Ongoing charge	0.850%
Charges taken from the fund under certain specific conditions	
Performance fee	None

- The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. The charges reduce the potential growth of your investment.
- The ongoing charges figure is an estimate rather than a historic figure because this better reflects the expected future charges. The charges may vary from year to year. The exact charges made for each financial year are contained in the fund's annual report.
- The annual management charge is taken from income.

For more information about charges, please see the fund's prospectus, which is available at [www.artemisfunds.com](http://www.artemisfunds.com) or [www.fundinfo.com](http://www.fundinfo.com).

**ASI Sterling Money Market Fund I Acc (ISIN GB00B1C42332) A sub-fund of Aberdeen Standard OEIC I. Aberdeen Standard Fund Managers Limited is the Authorised Corporate Director that manages the Fund.**

## OBJECTIVES AND INVESTMENT POLICY

### Investment Objective

The fund aims to generate income and preserve some capital over the short term (2 years or less) by investing in cash deposits and money market instruments.

**Performance Target:** The fund targets a return equivalent to 1 Week GBP LIBID. The Performance Target is the level of performance that the management team hopes to achieve for the fund. There is however no certainty or promise that they will achieve the Performance Target. 1 Week GBP LIBID has been chosen as a proxy for the return from cash deposits.

### Investment Policy

#### Portfolio Securities

- The fund invests at least 80% in cash deposits and money market instruments.
- The fund may also invest in reverse repos, securitisations and asset-backed commercial paper.
- The fund may also invest in other funds (including those managed by Aberdeen Standard Investments).
- The fund qualifies as a money-market fund under the MMF Regulation and more specifically as a Standard VNAV MMF.

#### Management Process

- The management team use their discretion (active management) to maintain a diverse asset mix at country, sector and company level.
- The fund is managed in line with the MMF Regulation which is used as a reference for portfolio management and risk monitoring of the fund. For example, constraints include limits on the average maturity of the portfolio.

### Derivatives and Techniques

- The fund may use derivatives to reduce risk, reduce cost and/or generate extra income or growth consistent with the risk profile of the fund (often referred to as "Efficient Portfolio Management").
- Derivatives include instruments used to manage expected changes in investments.

Investors in the fund may buy and sell shares on any dealing day (as defined in the Prospectus).

If you invest in income shares, income from investments in the fund will be paid out to you. If you invest in accumulation shares, income will be added to the value of your shares.

**Recommendation:** the fund may not be appropriate for investors who plan to withdraw their money within two years. Investors should satisfy themselves that their attitude to risk aligns with the risk profile of this fund before investing.

## RISK AND REWARD PROFILE

This indicator reflects the volatility of the fund's share price over the last five years which in turn reflects the volatility of the underlying assets in which the fund invests. Historical data may not be a reliable indication for the future.

The current rating is not guaranteed and may change if the volatility of the assets in which the fund invests changes. The lowest rating does not mean risk free.

The fund is rated as 1 because of the extent to which the following risk factors apply:

- The fund invests in securities which are subject to the risk that the issuer may default on interest or capital payments.
- The use of derivatives carries the risk of reduced liquidity, substantial loss and increased volatility in adverse market conditions, such as a failure amongst market participants. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses.
- The fund price can go up or down daily for a variety of reasons including changes in interest rates, inflation expectations or the perceived credit quality of individual countries or securities.
- The fund may hold money-market instruments, the value of which may be subject to adverse movements in extreme market conditions.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

## CHARGES

The charges you pay are used to pay the costs of running the fund including marketing and distributing it. These charges reduce the potential growth of your investment.

### One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

### Charges taken from the fund over a year

Ongoing charges	0.15%
-----------------	-------

### Charges taken from the fund under certain specific conditions

Performance fee	0.00%
-----------------	-------

The Ongoing Charges figure reflects the amount based on the expenses within the annual report for each financial year. This figure may vary from year to year. It excludes: performance fees (where applicable); portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling in another collective investment undertaking.

Where the Fund invests in an open-ended collective investment scheme which is operated or managed by the ACD/the Manager or an associate of the ACD/the Manager, no additional annual management charge will be incurred by the Fund on such an investment.

The annual report for each financial year will include detail on the exact charges made.

The Ongoing Charge figure is as at 31/07/2020.

A switching charge may be applied in accordance with the Prospectus. For more information about charges please see Prospectus.

Further information on the charges can be found in the Prospectus.

## Baillie Gifford International Fund - Class B Shares

Accumulation Shares - ISIN GB0005941272 (also representative of Income Shares - ISIN GB0005940316)

This Fund is a sub-fund of Baillie Gifford UK & Balanced Funds ICVC which is an Investment Company with Variable Capital. Baillie Gifford & Co Limited is the Authorised Corporate Director of the Fund and is wholly owned by Baillie Gifford & Co.

### Objectives and investment policy

#### Objective

- The Fund aims to outperform (after deduction of costs) the MSCI ACWI ex UK Index, as stated in sterling, by at least 2% per annum over rolling five-year periods.

#### Policy

- The Fund will invest at least 90% in shares of companies anywhere in the world (excluding the UK) and in any sector.
- The Fund will be actively managed.

#### Other Information

- You can sell some or all of your shares on any business day in the United Kingdom by contacting our Dealing Department by phone or post. Where properly completed documentation is received by post, shares will be sold at the next valuation point following receipt of the instruction.
- For Accumulation shares income will be re-invested. No further shares will be purchased but the reinvestment will be reflected in the price of your existing accumulation shares. You are, however, deemed to have received the income for tax purposes.
- For Income shares any income due to you will be paid into your bank or building society account, paid on the dates specified in the Prospectus.
- For further explanation and information see the investment objective and policy section of the Prospectus, which is available by contacting us.
- Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within five years.

### Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

- Please note that even the lowest risk class can lose you money and that extreme adverse market circumstances can mean you suffer severe losses in all cases.
- The Fund is classified in the category above because it invests in company shares which generally provide higher rewards and higher risks than other investments such as bonds or cash.
- The indicator does not take into account the following relevant material risks:
  - Investment markets can go down as well as up and market conditions can change rapidly. The value of an investment in the Fund, and any income from it, can fall as well as rise and you may not get back the amount invested.
  - The Fund has exposure to foreign currencies and changes in the rates of exchange will cause the value of any investment, and income from it, to fall as well as rise and you may not get back the amount invested.
  - Custody of assets, particularly in emerging markets, involves a risk of loss if the custodian becomes insolvent or breaches duties of care.
  - The Fund invests in emerging markets where difficulties in trading could arise, resulting in a negative impact on the value of your investment.
  - Where possible, charges are taken from the Fund's revenue. Where there is insufficient revenue, the remainder will be taken from capital. This will reduce the capital value of the Fund.
  - Infectious viruses may pose significant threats to human health and may be highly disruptive to global economies and markets. The economic and market disruptions caused by infectious viruses could impact the value of the investments of a Fund.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

### One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

### Charges taken from the Fund over a year

Ongoing charges	0.59%
-----------------	-------

### Charges taken from the Fund under specific conditions

Performance fee	NONE
-----------------	------

- The ongoing charges figure is based on the last year's expenses and may vary from year to year. It excludes the costs of buying or selling assets for the Fund (unless these assets are shares of another fund).
- For the ongoing charges, the figure is for Accumulation shares and is at 31/01/2021.
- Portfolio transaction costs, which are not included in the calculation of the ongoing charges figure but are incurred by the Fund when buying or selling investments, may have an impact on performance and are paid from the assets of the Fund.
- The Fund's annual report for each financial year will include detail on the exact charges made.
- You can find further details about the charges in Part 5 of the Prospectus.

## Fidelity Asia Pacific Opportunities Fund

a sub-fund of Fidelity Investment Funds

W Accumulation Shares (ISIN: GB00BQ1SWL90)

This fund is managed by FIL Investment Services (UK) Limited

### Objectives and Investment Policy

- The fund aims to increase the value of your investment over a period of 5 years or more.
- The fund will invest at least 70% in companies in the Asia Pacific region (excluding Japan). This region includes countries considered to be emerging markets as determined by the Investment Manager at its sole discretion.
- Emerging markets are countries progressing toward becoming advanced, usually shown by some development in financial markets, the existence of some form of stock exchange and a regulatory body.
- The companies will be either listed, incorporated, domiciled, or have significant business activities in the region.
- The remainder will be invested in companies outside of the region detailed above and in other investment types such as cash and derivatives.
- Derivatives are investments whose value is linked to another investment, or to the performance of a stock exchange or to some other variable factor, such as interest rates and used to reduce risk or transaction costs and/or to generate extra income or further increase the value of your investment.
- The fund aims to hold a concentrated portfolio, investing in 25-35 companies or other types of investment.
- The fund is actively managed. The Investment Manager identifies suitable opportunities for the fund utilising in-house research and investment capabilities.
- The Investment Manager will, when selecting investments for the fund and for the purposes of monitoring risk, consider the MSCI All Country Asia Pacific ex Japan Index.
- The Investment Manager has a wide degree of freedom relative to the index and may take larger, or smaller, positions in companies, and/or may invest outside the index, to take advantage of investment opportunities. This means the fund's investments and therefore performance may vary significantly from the index.
- Income earned by the fund is paid into the fund and reflected by an increase in the value of each share.
- Shares can usually be bought and sold each business day of the fund.

### Risk and Reward Profile

- Historical data may not be a reliable indication for the future.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean a "risk free" investment.
- The risk and reward profile is classified by the level of historical fluctuation of the Net Asset Values of the share class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.
- The value of your investment may fall as well as rise and you may get back less than you originally invested.
- The fund may invest in instruments denominated in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the value of your investment.
- Currency hedging may be used which aims to reduce the effect of such changes. However, the effects may not be completely eliminated to the degree expected.
- Liquidity is a measure of how easily an investment can be converted into cash. Under certain market conditions assets may be more difficult to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.
- Emerging markets may be more volatile and it could be harder to sell or trade securities. There may be less supervision, regulation and less well-defined procedures than in more developed countries. Emerging markets can be sensitive to political instability, which can result in greater volatility and uncertainty, subjecting the fund to the risk of losses.

## Charges for this fund (ISIN: GB00BQ1SWL90)

This means the fund's investments and therefore performance may vary significantly from the index.
- Income earned by the fund is paid into the fund and reflected by an increase in the value of each share.
- Shares can usually be bought and sold each business day of the fund.

### Risk and Reward Profile

- Historical data may not be a reliable indication for the future.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean a "risk free" investment.
- The risk and reward profile is classified by the level of historical fluctuation of the Net Asset Values of the share class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.
- The value of your investment may fall as well as rise and you may get back less than you originally invested.
- The fund may invest in instruments denominated in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the value of your investment.
- Currency hedging may be used which aims to reduce the effect of such changes. However, the effects may not be completely eliminated to the degree expected.

## Charges for this fund (ISIN: GB00BFRT3504)

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

### One-off charges taken before or after you invest

Entry charge N/A

Exit charge N/A

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

### Charges taken from the fund over a year

Ongoing charges 0.92%

### Charges taken from the fund under certain specific conditions

Performance fee N/A

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser / distributor.

The ongoing charges figure is based on expenses for the year ending 29/02/2020. This figure may vary from year to year. It excludes:

- performance fees (where applicable);
- portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.

For more information about charges, including the possibility that swing pricing may apply, please consult the most recent Prospectus.

## Past Performance

Past performance is not a guide to future performance results.

If any, the past performance shown takes into account the ongoing charges with exception of any applicable entry/exit charges.

The fund was launched on 04/11/1985. This class was launched on 13/11/2013. Past performance has been calculated in GBP.

The performance of the Benchmark is also included in the graph for comparative purposes.

If applicable, events in the fund's life which may have affected the performance history are highlighted as an '\*\*'; in the chart, which may include changes to the fund's objective and details of such events can be found on our website or by requesting it from your appointed representative or your usual Fidelity contact. If applicable, the Objectives and Investment Policy section shall refer to a benchmark and information on previous benchmarks may be found in the annual report and accounts.

## STRATEGIC BOND FUND

Class I Acc ISIN: GB0007533820  
Fund Currency: GBP Share Class Currency: GBP

**Janus Henderson**  
INVESTORS

A sub-fund of Janus Henderson UK & Europe Funds, a UK OEIC managed by Henderson Investment Funds Limited.

### Objective and investment policy

#### Objective

The Fund aims to provide a return, from a combination of income and capital growth over the long term.

Performance target: To outperform the IA Sterling Strategic Bond sector average, after the deduction of charges, over any 5 year period.

#### Investment policy

The Fund invests in a global portfolio of bonds of any quality, including high yield (non-investment grade) bonds, issued by governments or companies. Where investments are made in assets in currencies other than the base currency of the Fund, the Fund will seek to hedge those assets back to the base currency to remove the risk of currency exchange rate movements.

The Fund may also hold other assets including bonds of other types from any issuer, preference shares, cash and money market instruments. In certain market conditions, the Fund may invest more than 35% of its assets in government bonds issued by any one body.

The investment manager may use derivatives (complex financial instruments), including total return swaps, with the aim of making investment gains in line with the Fund's objective, to reduce risk or to manage the Fund more efficiently.

The Fund is actively managed with reference to the IA Sterling Strategic Bond sector average, which is based on a peer group of broadly similar funds, as this forms the basis of the Fund's performance target. The investment manager has complete freedom to choose individual investments for the Fund and to vary allocations between different types of bonds.

#### Strategy

The investment manager follows a flexible strategy that seeks to deliver total returns (capital appreciation and income) from investments across the entire spectrum of fixed income assets. Using careful macroeconomic research and credit analysis, the portfolio managers actively vary the allocation to different types of bonds to suit the prevailing economic environment.

**Distribution policy** The Fund offers accumulation shares (shares in which net income is retained within the price) and income shares (shares in which net income may be paid out to investors).

**Recommendation** This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

The Fund is designed to be used only as one component of several in a diversified investment portfolio. Investors should consider carefully the proportion of their portfolio invested into this Fund.

You can buy, sell or switch shares in the Fund on any dealing day and according to certain restrictions, both defined in detail in the Company's Prospectus.

### Risk and reward profile

♦ Potentially lower reward Potentially higher reward ♦  
♦ Lower risk Higher risk ♦

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The value of an investment and any income from it can go up or down. When you sell your shares they may be worth less than you paid for them.

The risk/reward rating above is based on medium-term volatility. In the future, the Fund's actual volatility could be higher or lower and its rated risk/reward level could change.

The share class appears at 4 out of 7. Share classes in higher categories have shown greater and/or more frequent variations in net asset value in the past 5 years than those in lower categories. The lowest category does not mean risk free.

Historical data, such as is used in calculating the SRRI, may not be a reliable indication of the future risk profile of the Fund.

The rating does not reflect the possible effects of unusual market conditions or large unpredictable events. Under normal market conditions the following risks may apply:

**Credit Risk** An issuer of a bond (or money market instrument) may become unable or unwilling to pay interest or repay capital to the Fund. If this happens or the market perceives this may happen, the value of the bond will fall.

**Interest Rates** When interest rates rise (or fall), the prices of different securities will be affected differently. In particular, bond values generally fall when interest rates rise. This risk is generally greater the longer the maturity of a bond investment.

**High Yield Bonds** The Fund invests in high yield (non-investment grade) bonds and while these generally offer higher rates of interest than investment grade bonds, they are more speculative and more sensitive to adverse changes in market conditions.

**Country or Region** If a Fund has a high exposure to a particular country or geographical region it carries a higher level of risk than a Fund which is more broadly diversified.

**Derivatives and Leverage** The Fund may use derivatives towards the aim of achieving its investment objective. This can result in 'leverage', which can magnify an investment outcome and gains or losses to the Fund may be greater than the cost of the derivative. Derivatives also introduce other risks, in particular, that a derivative counterparty may not meet its contractual obligations.

**Currency Hedging** When the Fund, or a hedged share/unit class, seeks to mitigate exchange rate movements of a currency relative to the base currency, the hedging strategy itself may create a positive or negative impact to the value of the Fund due to differences in short-term interest rates between the currencies.

**Liquidity** Securities within the Fund could become hard to value or to sell at a desired time and price, especially in extreme market conditions when asset prices may be falling, increasing the risk of investment losses.

**Charges to Capital** Some or all of the ongoing charges may be taken from capital, which may erode capital or reduce potential for capital growth.

**Counterparty Risk and Operational Risk** The Fund could lose money if a counterparty with which the Fund trades becomes unwilling or unable to meet its obligations, or as a result of failure or delay in operational processes or the failure of a third party provider.

For more information please see the Company's Prospectus.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of managing and distributing it. These charges reduce the potential growth of your investment.

If you invest through a third party provider you are advised to consult them directly as charges, performance and terms and conditions may differ materially to those shown in this document.

### One-off charges taken before or after you invest\*

Entry Charge	0.00%
Exit Charge	0.00%**

\* The charges shown are maximum figures. In some cases you may pay less.

\*\* Subject to a charge of up to 3.00% where the Manager suspects excessive trading by an investor (and specifically on subscriptions held for less than 90 days).

## Past performance

### Charges taken from the Fund over a year

Ongoing Charges	0.69%
-----------------	-------

The ongoing charges are based on actual annualised expenses for the period ending 30 June 2020. Ongoing charges may vary from year to year.

The figure for ongoing charges excludes portfolio transaction costs, except in the case of an initial charge paid by the Fund when buying shares or units in another fund.

For more information please see the Company's Prospectus.

The past performance is calculated in GBP.

The Fund was launched in October 1986 and the share class was launched in May 2000.

Past performance is not a guide to future performance.

The past performance shown in the chart takes into account all charges except one-off charges.

The Fund does not aim to track the performance of the index.

## JPM Emerging Markets Fund C - Net Accumulation a Share Class of JPM Emerging Markets Fund a Fund of JPMorgan Fund ICVC

ISIN GB0030881774

The Authorised Corporate Director ("ACD") is JPMorgan Funds Limited

## Objective and Investment Policy

**Investment Objective:** To provide long term capital growth by investing primarily in equity and equity-linked securities of emerging markets companies.

### Investment Approach:

- ▶ Uses a fundamental, bottom-up stock selection process.
- ▶ Uses a high conviction approach to finding the best investment ideas.
- ▶ Seeks to identify high quality companies with superior and sustainable growth potential.

**Investment Policy:** Emerging Markets companies are companies that are incorporated under the laws of, and have their registered office in, an Emerging Market country, or that derive the predominant part of their economic activity from Emerging Market countries, even if listed elsewhere. Smaller companies may be held on an ancillary basis.

The Fund may also use Financial Derivative Instruments (derivatives) for the purpose of Efficient Portfolio Management, including hedging, where appropriate.

The Fund may invest in China A-Shares via the China-Hong Kong Stock Connect programmes.

The Fund may invest in assets denominated in any currency and non-Sterling currency exposure will not normally be hedged back to Sterling.

**Redemption and Dealing:** Shares of the Fund may be redeemed on demand, with dealing normally on a daily basis.

**Benchmark:** The benchmark of the Fund is MSCI Emerging Markets Index (Net).

The Fund is actively managed. The Benchmark is a performance comparator and the Fund may bear little resemblance to its Benchmark. The Benchmark has been chosen as it reflects the main investment universe and strategy for the Fund.

**Distribution Policy:** This Share Class will reinvest income.

## Risk and Reward Profile

The above rating is based on the historic volatility of the Net Asset Value of the Share Class over the last five years and may not be a reliable indication of the future risk profile of the Share Class.

The risk and reward category shown above is not guaranteed to remain unchanged and may change over time.

A Share Class with the lowest risk rating does not mean a risk-free investment.

**Why is this Share Class in this category?** This Share Class is classified in category 6 because its Net Asset Value has shown high fluctuations historically.

### Other material risks:

- ▶ The value of your investment may fall as well as rise and you may get back less than you originally invested.

- ▶ The value of equity and equity-linked securities may fluctuate in response to the performance of individual companies and general market conditions.
- ▶ Emerging markets may be subject to increased political, regulatory and economic instability, less developed custody and settlement practices, poor transparency and greater financial risks. Emerging market currencies may be subject to volatile price movements. Emerging market securities may also be subject to higher volatility and be more difficult to sell than non-emerging market securities.
- ▶ The Fund may invest in China A-Shares through the China-Hong Kong Stock Connect Programmes which are subject to regulatory change, quota limitations and also operational constraints which may result in increased counterparty risk.
- ▶ Movements in currency exchange rates can adversely affect the return of your investment.
- ▶ Further information about risks can be found in "Part 11: Risk Warnings" of the Prospectus.

## Charges

### One-off charges taken before or after you invest

**Entry charge** None

**Exit charge** None

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

### Charges taken from this Share Class under certain specific conditions

**Performance fee:** None

- ▶ The actual entry and exit charges paid may be less. Information on charges can be obtained from the investor's financial adviser.
- ▶ The Prospectus permits a fee to be charged for switching between Funds but this fee is currently waived by the Authorised Corporate Director.
- ▶ The ongoing charge is based on the last year's expenses to December 2020 and may vary from year to year.
- ▶ Charges are used to pay the costs of running this Share Class. These charges reduce the potential growth of the investment.
- ▶ Further information about charges can be found in "Part 5: Charges and Expenses" section of the Prospectus.

## Past Performance

- ▶ Past performance is not a guide to future performance.
- ▶ Performance data has been calculated including tax, ongoing charges and portfolio transaction costs and excluding entry and exit charges, in GBP.
- ▶ Fund launch date: 1994.
- ▶ Share Class launch date: 1994.

The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## Legal & General UK Property Feeder Fund (the "Fund")

### Class I Accumulation - ISIN: GB00BK35F408

The authorised fund manager of the Fund is Legal & General (Unit Trust Managers) Limited.

## OBJECTIVES AND INVESTMENT POLICY

- The objective of this Fund is to provide a combination of income and capital growth by investing solely in the Legal & General UK Property Fund (the 'Master Fund'). It may also hold cash where necessary to enable the making of payments to unit holders or creditors.
- The Fund aims to achieve investment returns very similar to those of the Master Fund.
- The Master Fund will typically invest at least 80% of its assets in a range of property. However, it may reduce this level (to no lower than 60% in commercial property) from time to time if it believes it is in the interests of maintaining liquidity and performance.
- The Master Fund may invest up to 20% in residential property and may also develop properties. The Master Fund may also invest from time to time in the Isle of Man and the Channel Islands, however at least 80% of the value of the properties will be situated in the United Kingdom.
- The Master Fund may also invest in other UK property-related assets, (including property-related shares and property-related collective investment schemes), money market instruments (such as treasury bills), cash, deposits, money market-related collective investment schemes, including those managed and operated by Legal & General.
- The Master Fund may use derivatives (contracts which have a value linked to the price of another asset) to:
  - reduce risk or cost; or
  - generate additional capital or income with no, or an acceptably low, level of risk.
- The Master Fund is actively managed as the Manager uses their expertise to pick investments to achieve the Fund's objectives.
- The Master Fund is not managed to a constraining or target benchmark.
- Your units will be accumulation units. Income from the Fund's investments (dividends) will be reinvested back into the value of your units.
- You can buy or sell units in this Fund on any business day. You need to contact us with your instruction before 12 noon. This is the time we calculate unit prices for this Fund. If you contact us after 12 noon, the units will be bought or sold at the next business day's price.
- The Fund's base currency is denominated in sterling (British pounds).
- The Master fund incurs transaction costs relating to buying and selling properties and other assets which are likely to impact returns from your investment. These costs are paid from the Master Fund's assets and are in addition to the entry or ongoing fund charges shown overleaf.
- This Fund is designed for investors looking for growth and income from an investment in balanced portfolio of predominantly UK Commercial Property and who are ineligible or unable to invest directly in the Master Fund.
- Although investors can take their money out at any time, this Fund may not be appropriate for those who plan to withdraw their money within five years.
- This Fund is not designed for investors who cannot afford more than a minimal loss of their investment.
- If you do not understand this document we recommend you seek additional information to help you decide if this Fund is right for you.

## RISK AND REWARD PROFILE

- The value of your investment may fall as well as rise and is not guaranteed. You might get back less than you invest.
- The following are additional risks that apply to the Master Fund and can impact the Legal & General UK Property Feeder Fund:
- The fund manager runs a fund to meet its objective and you should expect a Fund's investments to change over time. The Fund's level of risk may also change in the future.
  - At times it may be difficult for the Master Fund to make investments or sell assets to meet investors' requests to buy/sell units. Where this occurs the Fund may experience reduced investment performance for a period or have difficulty paying proceeds to investors who wish to sell units.
  - Property can be difficult to buy or sell. This could mean: (i) cash builds up waiting to be invested, so the Fund will underperform when property returns are greater than the interest earned; and/or (ii) property may have to be sold for less than expected.
  - If an exceptional amount of withdrawals are requested, the fund manager may be forced to sell properties quickly. This could mean that properties are sold for less than expected which would reduce the value of your investment.
  - In times of market uncertainty or if an exceptional amount of withdrawals are requested it may become less easy for the Fund to sell its holdings in other funds and the Manager may defer withdrawals, or suspend dealing. The

Manager can only delay paying out if it is in the interests of all investors and with the permission of the Fund trustee or depositary.

- Rental growth is not guaranteed and unpaid rent could affect the performance of your investment.
- The value of property is generally a matter of valuer's opinion rather than fact and the true value of a property may not be recognised until the property is sold. In certain circumstances we may not be able to obtain a valuer's opinion and will apply our own valuation.
- The Master Fund will undertake development of properties where the full benefits of any increases in the value of the property or the income earned from it are not received until completion. While any development is taking place, the Fund is at risk from delays, increased costs or not achieving the predicted improvement in increasing the value of the property or rent received.
- The Fund could lose money if any institutions providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the Fund.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.

## CHARGES

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential return from your investment.

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%
This is the maximum that might be taken out of your money before it is invested.	
The Fund also incurs transaction costs. See opposite.	
Charges taken from the fund over a year	
Ongoing charge	0.75%
Charges taken from the fund under certain specific conditions	
Performance fee	None

- There are no entry or exit charges.
  - The ongoing charges figure is based on the latest available expenses at December 2020. This figure may vary from year to year.
  - This Fund's ongoing charges include the ongoing charges of the Master Fund. They exclude portfolio transaction costs.
  - The ongoing charges are taken from the income of the Fund.
- Other costs:**
- **Transaction costs:** each day there are two prices for this Fund: a higher price you pay to buy units and a lower price you receive when you sell units. The Fund manager calculates these prices. The difference between these prices is called the 'spread'.
  - The spread is separate to the ongoing charges shown in this section. This Fund's spread reflects the transaction costs of buying and selling commercial property, and other assets, incurred by the Master Fund. The spread can change at any time and by any amount. As an example, the buying price for units in this Fund was 6.19% higher than the selling price at 28 January 2021. Please note that the spread will be incurred on transfers between this Fund and the Master Fund, except on certain dates.
  - **Property expense ratio:** The Master Fund has other costs in addition to its ongoing charges and transaction costs which will impact your investment. They include costs such as maintenance and repair fees, property management fees, letting costs and legal fees related to running properties. Full details are in the Master Fund's Prospectus. These additional costs are represented by the property expense ratio (PER). The PER is 0.20% (at November 2020).
  - For more information about charges and transaction costs, please see the charges and expenses section in the Fund's Prospectus, or visit our website at [legalandgeneral.com/chargesandfees](http://legalandgeneral.com/chargesandfees).

## PAST PERFORMANCE

- Past performance is not a guide to future performance.
- The figures for the Fund take into account the ongoing charges and assume income (after any tax) is reinvested.
- The performance has been calculated in Sterling (British Pounds).
- The annual return is for a 12 month period ending 31 December.
- The Fund launched in 2014.
- This unit class launched in 2014.
- To assess the performance of the Fund, it can be compared to the IA sector, UK Direct Property (referred to as the "Comparator" in the chart opposite).
- **The Fund invests solely in the Master Fund. The Fund launched in 2014 following a restructure of the previous property unit trust which merged into the newly created Master Fund on 24 May 2014. Prior to this date the chart opposite shows the performance of the equivalent class in the previous property unit trust.**

## LF Lindsell Train UK Equity Fund, Accumulation Shares, (ISIN: GB00B18B9X76)

The fund is managed by Link Fund Solutions Limited.

### Objective and investment policy

#### Objective

To achieve growth in capital (an increase in the value of the fund), growth in income (money available to be paid out by the fund) and provide a total return (a combination of income and capital growth) in excess of the FTSE All-Share Total Return Index after all costs and charges have been taken, over at least five years.

There is no guarantee that the objective will be met over any time period and you may get back less than you invest.

#### Investment Policy

To invest at least 80% of the fund in the shares of United Kingdom companies. The fund may also invest up to 20% in non-UK companies, (including emerging markets which are countries whose economies are progressing towards becoming advanced) cash and money market instruments (which are short term loans that pay interest). The fund will be concentrated and is unlikely to have more than 35 investments.

The Portfolio Manager will buy shares in companies that they expect to hold for long periods of time and, in their opinion, are profitable, long standing, of high quality, have strong balance sheets and which they expect to increase in value.

#### Other features of the fund:

- The fund is actively managed. The Portfolio Manager uses their expertise to select investments for the fund. Whilst the fund aims to outperform the FTSE All-Share TR Index (which has been selected as it represents broad exposure to UK companies) the fund is not constrained by the index and will take positions in individual stocks that differ significantly from the index.
- The fund can invest across different industry sectors in accordance with the above limitations.
- In extraordinary market conditions which could result in significant loss, the fund has the ability to invest 100% in lower risk assets such as cash.
- You can buy and sell shares in the fund on each business day.
- Income from the fund will be added to the value of your investment.
- Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

### Risk and reward profile

- This indicator shows how much a fund has risen and fallen in the past, and therefore how much a fund's returns have varied. It is a measure of a fund's volatility. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains.
- The fund has been classed as 5 because its volatility has been measured as above average.
- This indicator is based on historical data and may not be a reliable indication of the future risk profile of this fund.
- The risk and reward profile shown is not guaranteed to remain the same and may shift over time. The lowest number on the scale does not mean that a fund is risk free.
- Currency Risk: As the fund can be exposed to different currencies, changes in exchange rates may decrease the value of your investment.
- Counterparty Risk: The failure of a firm involved in a transaction with the fund or providing services to the fund may expose the fund to financial loss.
- Emerging Markets Risk: The fund may invest in emerging markets, which are markets in countries that are developing. Emerging markets may have more political and economic risks than developed markets, resulting in price movements that may cause a loss to the fund.
- Concentrated Fund Risk: The fund intentionally holds a small number of investments and so will be more concentrated than many other funds. The fund may also invest in stocks with a particular industry, sector or geographical focus. This means that the performance of a single stock, industry, sector or geographical region within the fund has a greater effect (loss or gain) on the value of the fund.
- For full details of the fund's risks, please see the prospectus which may be obtained from the address in 'Practical Information' below.

## Charges for this fund

The charges you pay are used to pay the costs of running the fund. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	None
Exit Charge	None
Charges taken from the fund over the year	
Ongoing Charges	0.64%
Charges taken from the fund under certain specific conditions	
Performance Fee	None

The ongoing charges figure is based on expenses as at 30 November 2020. The ongoing charges are taken equally from the income and capital of the fund. It excludes portfolio transaction costs, except entry/exit charges paid by the fund when buying or selling units in other collective investment schemes.

You may also be charged a dilution levy (an amount to cover dealing costs incurred by the fund) on entry to or exit from the fund. This is normally only charged when the dealing costs are significant.

For more information about charges, please see the prospectus sections 3.5 & 7, which may be obtained free of charge from the address in 'Practical Information' below.

## Past performance

- Past performance is not a guide to future performance.
- The past performance in the chart shown opposite is net of tax and charges but excludes the entry charge that may be paid on the purchase of an investment.
- The fund was launched in July 2006.
- Performance is calculated on a total return basis in Pounds Sterling.

## UK SMALLER COMPANIES FUND

### KEY INVESTOR INFORMATION DOCUMENT

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Liontrust UK Smaller Companies Fund is an Authorised Unit Trust and categorised as a UCITS scheme. This document is based upon the I Acc class (ISIN: GB00B8HWPP49). This Fund is managed by Liontrust Fund Partners LLP, a subsidiary of Liontrust Asset Management PLC.

### Objective

- The Fund aims to deliver capital growth over the long term (5 years or more).

### Policy

- The Fund is considered to be actively managed in reference to the benchmark(s) in the performance table by virtue of the fact that it uses the benchmark(s) for performance comparison purposes. The benchmark(s) are not used to define the portfolio composition of the Fund and the Fund may be wholly invested in securities which are not constituents of the benchmark.
- The Fund will invest at least 90% of its assets in companies which are incorporated, domiciled or conduct significant business in the United Kingdom (UK).
- At least 75% of the companies held by the Fund will have a market capitalisation of less than £1bn.
- The Fund will typically invest 90% (minimum 80%) of its assets in equities or equity related derivatives but may also invest in collective investment schemes (up to 10% of Fund assets), corporate debt securities, other transferable securities, money market instruments, warrants, cash and deposits.
- The Fund is permitted to use derivatives for the purposes of efficient portfolio management and for investment purposes. Please refer to the Derivatives sections in the prospectus for further details.

### Recommendation

- This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

### How to buy

- You may buy or sell units on a daily basis (but not weekends or Bank Holidays). Orders must be received by 11:59am for execution at 12:00 midday valuation point on the same day. Further details can be found at [www.liontrust.co.uk](http://www.liontrust.co.uk). The Fund is dual priced; it has an offer (buying) price and a bid (selling) price and the difference between these (bid-offer spread) is dependent on the underlying holdings. This means investors buying and selling are compensating existing investors for any dilution in the fund's value caused by underlying transaction costs. For a fuller explanation, please visit [www.liontrust.co.uk](http://www.liontrust.co.uk).

### Investment process

- A fundamental principle of competitive markets is that profits regress to the mean. The fund managers believe the secret to successful investing is to identify those few companies that have a durable Economic Advantage which allows them to defy this principle and sustain a higher than average level of profitability for longer than expected.
- Economic Advantage is the collection of distinctive characteristics of a company that competitors struggle to reproduce even if those competitors have understood the benefits arising from those characteristics. In the fund managers' experience, the hardest to replicate characteristics fall into the following three categories of intangible assets:
  - Intellectual property
  - Strong distribution channels
  - Significant recurring business
- Other less powerful but nonetheless important intangible strengths include: franchises and licenses; good customer databases and relationships; effective procedures and formats; strong brands and company culture. These intangible assets produce barriers to competition, protect margins and are capable, in the opinion of the fund managers, of reaping a financial advantage in the form of cash flow returns in excess of the cost of capital. The market rewards excess profitability, particularly when it is higher than consensus expectations.
- To be included in portfolios, companies must possess at least one of the main advantages: intellectual property, strong distribution or recurring business (at least 70% of annual turnover).
- Every smaller company held in the Economic Advantage funds has at least 3% of its equity held by senior management and main board directors. Companies are also assessed for employee ownership below the senior management and board and changes in equity ownership are monitored.

### Risk and reward profile

Lower Risk  
Typically lower rewards

Higher Risk  
Typically higher rewards

- This Synthetic Risk and Reward Indicator (SRRI) is based on historical data and may not be relied upon to gauge the future risk profile of the Fund.
- The SRRI shown is not guaranteed to remain the same and may shift over time.
- The lowest category (1) does not mean 'risk free'.
- The Fund's risk and reward category has been calculated using the methodology adopted by the Financial Conduct Authority. It is based upon the rate by which the Fund or a representative fund or index's value has moved up and down in the past.
- The Fund is categorised 5 primarily for its exposure to small UK companies
- The SRRI may not fully take into account the following risks:
  - that a company may fail thus reducing its value within the Fund;
  - any company which has high overseas earnings may carry a higher currency risk;
- As the Fund is primarily exposed to smaller companies there may be liquidity constraints from time to time, i.e. in certain circumstances, the fund may not be able to sell a position for full value or at all in the short term. This may affect performance and could cause the fund to defer or suspend redemptions of its shares. In addition the spread between the price you buy and sell units will reflect the less liquid nature of the underlying holdings.
- Counterparty risk: any derivative contract, including FX hedging, may be at risk if the counterparty fails.

- The Fund may invest in companies listed on the Alternative Investment Market (AIM) which is primarily for emerging or smaller companies. The rules are less demanding than those of the official List of the London Stock Exchange and therefore companies listed on AIM may carry a greater risk than a company with a full listing.
- The Fund may, under certain circumstances, make use of derivative instruments but it is not intended that their use will materially affect volatility.
- For full details of the Fund's risks, please see the prospectus which may be obtained from Liontrust (address overleaf) or online at [www.liontrust.co.uk](http://www.liontrust.co.uk).

## Royal London Cash Plus Fund (Accumulation - Class Y Shares)

A sub-fund of Royal London Bond Funds ICVC ISIN: GB00BMNR1H58  
Managed by Royal London Unit Trust Managers Limited

### Objectives and investment policy

**Objective** The Fund's investment objective is to achieve a total return over rolling 12-month periods by mainly investing in cash and cash equivalents and government securities.

The Fund's performance target is to outperform, before the deduction of charges, the Bank of England Sterling Overnight Interbank Average (SONIA) by 0.50% per annum over rolling 12-month periods.

**Policy** A minimum of 50% of the Fund will be invested in a combination of money market instrument, including cash, time deposits, certificates of deposit and commercial paper and floating rate notes. Government bonds are also included in this segment of the Fund. In exceptional circumstances the Fund may invest up to 100% in money market instruments.

The Fund will also invest in a range of securities, including corporate bonds and supranational & agency bonds, asset backed securities and/or transferable securities. The Fund may also make use of reverse repurchase agreements. The Fund may also hold a small amount of its portfolio in derivatives.

Money market instruments used by the Fund will have a minimum rating of A-1, P-1 or F1. Bonds must have a minimum rating of AA-, Aa3 or AA-. Assets may exceed 397 days to maturity. There are no weighted average maturity or weighted average life constraints on the Fund.

The Fund's holdings are also subject to predefined ethical criteria. The Fund's manager will not consider the bonds or other securities of companies or other organisations that generate more than 10% of their turnover from either one or a combination of the following: Armaments, Tobacco or Fossil Fuels.

Full details of the Fund's ethical criteria are available on request and can be found on our website.

**Recommendation** Investors who seek income or a short-term investment option.

### Concepts to understand

**Bonds** Securities that represent an obligation to repay a debt, with interest. Investment grade bonds are high quality bonds that are viewed as being highly likely to make all scheduled payments of interest and principal. Low quality bonds carry higher risk but also typically pay higher rates of interest.

**Derivative** A financial instrument whose price is dependent upon or derived from one or more underlying asset.

**Efficient Portfolio Management** An investment technique that allows the use of derivatives for at least one of the following purposes: to increase the value of the Fund; to protect the value of the Fund or to reduce the risks of certain investments.

**Money market instruments** Investments that pay interest, have a short duration and are designed to maintain a stable value.

*You can buy and sell your shares on each working day, except public holidays, at 12:00 noon if you tell us before 12:00 noon that you want to do so. Instructions received after 12:00 noon will be processed at 12:00 noon on the following working day.*

Other share classes may be available as described in the Prospectus. If this is an income share class, any income will be paid out to you. If this is an accumulation share class, any income will be reinvested in the Fund.

### Risk and reward profile

Typically lower rewards

Typically higher rewards

The fund is shown in risk category 1 because its share price has shown a very low level of volatility historically. The indicator has been calculated using historical data and may not be a reliable indication of the future risk profile of the Fund. As an investment, bonds are typically more volatile than money market instruments but less volatile than shares. Bonds issued by corporations are typically more volatile than bonds issued by governments. The risk and reward indicator is not a measure of the expected rise or fall in capital but shows how sharply the Fund's share price has gone up and down historically.

A fund whose share price has experienced sharp or large increases or decreases will sit in a higher risk category, whereas a fund whose share price has experienced small or gradual increases or decreases will sit in a lower risk category.

The indicator is calculated using a standard methodology derived from EU rules.

The risk/reward indicator is an estimate and not a guarantee. Going forward, the Fund's actual volatility could be higher or lower, and its rated risk/reward profile could change. The lowest risk category does not mean the investment is risk free.

The risk indicator does not adequately capture the following risks, which are materially relevant to the Fund:

**Investment Risk** The value of investments and any income from them may go down as well as up and is not guaranteed. Investors may not get back the amount invested.

**Credit Risk** Should the issuer of a fixed income security become unable to make income or capital payments, or their rating is downgraded, the value of that investment will fall. Fixed income securities that have a lower credit rating can pay a higher level of income and have an increased risk of default.

**EPM Techniques** The Fund may engage in EPM techniques including holdings of derivative instruments. Whilst intended to reduce risk, the use of these instruments may expose the Fund to increased price volatility.

**Interest Rate Risk** Fixed interest securities are particularly affected by trends in interest rates and inflation. If interest rates go up, the value of capital may fall, and vice versa. Inflation will also decrease the real value of capital.

**Counterparty Risk** The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

**Government and Public Securities Risk** The Fund can invest more than 35% of net assets in different Transferable Securities and Money Market Instruments issued or guaranteed by any EEA State, its local authorities, a third country or public international bodies of which one or more EEA States are members.

**Inflation Risk** Where the income yield is lower than the rate of inflation, the real value of your investment will reduce over time.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing the Fund. These charges reduce the potential growth of the investment.

### One-off charges taken before or after you invest:

Entry charge	None
--------------	------

Exit charge	None
-------------	------

### Charges taken from the fund over a year:

Ongoing charge	0.15%
----------------	-------

### Charges taken from the fund under specific conditions:

Performance fee	None
-----------------	------

The entry and exit charge is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Ongoing charge is based on the Fund Management Fee (FMF), which is the periodic fee paid to the ACD to cover the expenses of the Fund. This figure does not include portfolio transaction costs. Ongoing charges are the same for all investors in the share class.

## Past performance

The graph shows fund performance over the past 10 years where available. The figure for a given year shows how much the Fund increased or decreased in value during that year. These results reflect ongoing charges taken from the Fund, but do not reflect any entry charges you might have to pay.

The Fund was launched on 15 June 2011 and the share class on 12 June 2014.

Managed by Royal London Unit Trust Managers Limited

### Objectives and investment policy

**Objective** The Fund's investment objective is to achieve a total return (combination of capital growth and income) over the medium term (3-5 years) by investing at least 80% in sterling-denominated corporate bonds, which meet predetermined ethical criteria.

The Fund's performance target is to outperform the Markit iBoxx Sterling Non-Gilt Overall All Maturity Index (the "Index") over a rolling 5-year period. For further information on the Fund's index, please refer to the Prospectus.

The Fund is actively managed.

**Policy** At least 80% of the Fund will be invested in corporate bonds denominated in sterling or hedged back to sterling, which will generally be fixed-rate issues (bonds paying interest at an unchanging rate, rather than on an adjustable basis).

The remainder of the Fund's assets may be invested in a range of securities, including government bonds, index-linked bonds, securitisations, supranational bonds, agency bonds, preference shares, floating-rate notes and bonds denominated in currencies other than sterling.

A limited amount of the Fund's assets may be invested in other transferable securities and money market instruments. The Fund may also invest hold a small amount of its portfolio in derivatives (investments that derive their value from another closely related underlying investment) for the purposes of efficient portfolio management.

Cash is unlikely to exceed 5% of assets.

**Recommendation** The Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

### Concepts to understand

**Bonds** are defined as fixed-income investments issued as debt by companies and public bodies to raise finance. Investors in bonds receive a previously agreed, non-variable interest payment until the investment matures. Corporate bonds are those issued by companies to raise finance.

**Total Return** A total return is a combination of capital growth and income. Capital growth is defined as the rise in an investment's value over time and income as the payment an investment generates, such as dividends or bond coupons.

**Rolling 5 Year Period** A rolling 5-year period is any period of five years, no matter which day you start on.

**Hedged** Hedging reduces risk by protecting an investment with another related investment.

**Efficient Portfolio Management** A list of approved investment techniques, including the use of derivatives, used to protect against excessive risk, reduce cost or generate extra income or growth.

*You can buy and sell your shares on each working day, except public holidays, at 12:00 noon if you tell us before 12:00 noon that you want to do so. Instructions received after 12:00 noon will be processed at 12:00 noon on the following working day.*

Other share classes may be available as described in the Prospectus. If this is an income share class, any income will be paid out to you. If this is an accumulation share class, any income will be reinvested in the Fund.

### Risk and reward profile

Typically lower rewards

Typically higher rewards

The fund is shown in risk category 4 because its simulated price has shown a medium level of volatility historically. The Fund was formed by merger and the SRRI was calculated using historic data from the merging fund and may not be a reliable indicator of the future risk profile of the fund. As an investment, bonds are typically more volatile than money market instruments but less volatile than shares. Bonds issued by corporations are typically more volatile than bonds issued by governments.

The risk and reward indicator is not a measure of the expected rise or fall in capital but shows how sharply the Fund's share price has gone up and down historically.

A fund whose share price has experienced sharp or large increases or decreases will sit in a higher risk category, whereas a fund whose share price has experienced small or gradual increases or decreases will sit in a lower risk category.

The indicator is calculated using a standard methodology derived from EU rules.

The risk/reward indicator is an estimate and not a guarantee. Going forward, the Fund's actual volatility could be higher or lower, and its rated risk/reward profile could change. The lowest risk category does not mean the investment is risk free.

The risk indicator does not adequately capture the following risks, which are materially relevant to the Fund:

**Investment Risk** The value of investments and any income from them may go down as well as up and is not guaranteed. Investors may not get back the amount invested.

**Charges from Capital Risk** Charges are taken from the capital of the Fund. Whilst this increases the yield, it also has the effect of reducing the potential for capital growth.

**Counterparty Risk** The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.

**Credit Risk** Should the issuer of a fixed income security become unable to make income or capital payments, or their rating is downgraded, the value of that investment will fall. Fixed income securities that have a lower credit rating can pay a higher level of income and have an increased risk of default.

**EPM Techniques** The Fund may engage in EPM techniques including holdings of derivative instruments. Whilst intended to reduce risk, the use of these instruments may expose the Fund to increased price volatility.

**Interest Rate Risk** Fixed interest securities are particularly affected by trends in interest rates and inflation. If interest rates go up, the value of capital may fall, and vice versa. Inflation will also decrease the real value of capital.

**Liquidity Risk** In difficult market conditions the value of certain fund investments may be difficult to value and harder to sell, or sell at a fair price, resulting in unpredictable falls in the value of your holding.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing the Fund. These charges reduce the potential growth of the investment.

### One-off charges taken before or after you invest:

Entry charge	None
--------------	------

Exit charge	None
-------------	------

### Charges taken from the fund over a year:

Ongoing charge	0.55%
----------------	-------

### Charges taken from the fund under specific conditions:

Performance fee	None
-----------------	------

The entry and exit charge is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

The ongoing charges figure is based on expenses as at 31 December 2020. This figure may vary from year to year and does not include portfolio transaction costs. Ongoing charges are the same for all investors. The annual report for each financial year will include details on the exact charges made.

## Past performance

The Fund was launched on 12 April 2019 and the share class on 12 April 2019. The performance shown below is that of the merging fund. The merging fund had the same investment objectives and policy as this fund.

# Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## Vanguard FTSE U.K. All Share Index Unit Trust (the "Fund")

GBP Acc

ISIN: GB00B3X7QG63

Manager: Vanguard Investments UK, Limited ("VIUK")

## Objectives and investment policy

- The Fund seeks to track the performance of the FTSE All-Share Index (the "Index").
- The Index is a free-float market-capitalisation weighted index representing the performance of all eligible companies listed on the London Stock Exchange's main market, which pass screening for size and liquidity. Free-float means that only shares readily available in the market are included when calculating a company's weight in a given index and excludes locked-in shares (such as those held by governments). Market-capitalisation is the value of a company's outstanding shares in the market and shows the size of a company.
- The Fund is a passive fund which means it takes the form of tracking a specific index in order to replicate its performance.
- The Fund attempts to:
  1. Track the performance of the Index as closely as possible by investing in a representative sample of the component shares of the Index.
  2. Remain fully invested in shares and hold small amounts of cash except in extraordinary market, political or similar conditions where the Fund may temporarily depart from this investment policy to avoid losses.
- The Fund may use derivatives (i.e. a financial contract whose value is based on the value of a financial asset (such as a share, bond, or currency) or a market index) in order to reduce risk or cost and/or generate extra income or growth (known as "efficient portfolio management").
- The currency of the unit class is GBP.
- The Fund may not be appropriate for short-term investment.

- Income from the Fund will be reinvested and reflected in the price of units in the Fund.
- Portfolio transaction costs will have an impact on performance.
- Units in the Fund can be bought or sold on a daily basis (save on certain bank holidays or public holidays and subject to certain restrictions described in Appendix 1 of the prospectus) by submitting an application in writing or by telephone. A full list of the days on which units in the Fund cannot be sold is available on:

**For further information about the objectives and investment policy of the Fund and Vanguard's relationship with the Index provider, please see Appendix 1 and the "Disclaimer" section of the Vanguard FTSE U.K. All Share Index Unit Trust (the "prospectus"). See the Practical Information Section for details of how to obtain a copy of the prospectus.**

## Risk and reward profile

- This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean "risk free".
- The Fund is rated 6 due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
  - The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
  - Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political or regulatory events.

**The risk and reward indicator does not take account of the following risks of investing in the Fund:**

- Counterparty risk. The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Liquidity risk. Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily which could cause the Fund to incur higher costs when buying or selling investments or could mean that the Fund is not able to buy or sell investments when it would like to do so.
- Index tracking risk. The Fund is not expected to track the performance of the Index at all times with perfect accuracy. The Fund is, however, expected to provide investment results that, before expenses, generally correspond to the price and yield performance of the Index.
- Index sampling risk. As the Fund uses an index sampling technique whereby a representative sample of securities are selected to represent the Index, there is the risk that the securities selected for the Fund may not, in the aggregate, approximate the full Index.
- Use of derivatives. The use of derivatives could increase or reduce exposure to underlying assets and result in greater fluctuations of the Fund's net asset value.

**For further information on risks please see the "Risk Factors and Performance" section of the prospectus on our website at <https://global.vanguard.com>**

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
